Professional Summary

Data Science undergraduate and aspiring Data Analyst with hands-on experience in data collection, cleaning, exploratory data analysis, dashboard development, and reporting. Proficient in Excel, SQL, Python, Power BI, and data visualization. Experienced in transforming raw datasets into meaningful business insights through academic projects, internships, and job simulations. Possesses strong analytical, problem-solving, communication, teamwork, and documentation skills, with a strong interest in predictive analytics and data-driven decision-making.

Technical Skills

Programming: Python, R Programming
Data Analysis: Pandas, NumPy, Exploratory Data Analysis, Data Cleaning, Data Processing, Statistical Analysis
Visualization: Power BI, Microsoft Excel, Matplotlib, Dashboard Development, KPI Reporting
Databases: SQL, MySQL
Machine Learning: Linear Regression, Logistic Regression, K-Nearest Neighbors, Decision Trees, Random Forest, K-Means Clustering, Support Vector Machines
Tools: Git, GitHub, Jupyter Notebook, Visual Studio Code, Microsoft Office
Professional Skills: Analytical Thinking, Problem Solving, Communication, Team Collaboration, Documentation, Presentation, Attention to Detail

Internship Experience

Data Analytics Intern **April 2026 – Present**
3Skills *Remote*

- Assisted in collecting, cleaning, validating, and processing structured datasets from multiple sources.
- Performed exploratory data analysis to identify trends, patterns, anomalies, and relationships within business data.
- Created interactive dashboards, charts, reports, and key performance indicators using Microsoft Excel and Power BI.
- Translated project and business requirements into structured data analysis tasks and measurable outputs.
- Documented data-cleaning procedures, analytical methods, formulas, assumptions, and project findings.
- Participated in team meetings and presented project progress, analytical findings, and dashboard insights.
- Performed quality checks to improve the accuracy, completeness, and consistency of analytical outputs.
- Learned and applied new data analysis tools and techniques based on project requirements.

Data Analytics Intern **April 2026 – Present**
NeoSkill *Remote*

- Worked with datasets using Excel, SQL, and visualization tools to generate meaningful analytical insights.
- Applied data-cleaning techniques such as duplicate removal, missing-value treatment, data-type correction, and standardization.
- Developed analytical reports and visualizations to communicate trends and performance metrics clearly.
- Collaborated with mentors and team members to complete assigned analytical tasks and project deliverables.

Data Science Intern **March 2024 – May 2024**
YHills *Remote*

- Completed practical training in Python, data analysis, data visualization, machine learning, and Power BI.
- Analyzed datasets using Python libraries including Pandas, NumPy, Matplotlib, and Scikit-learn.
- Developed projects involving predictive modelling, classification, data cleaning, and dashboard creation.
- Presented project outcomes and documented the methods, tools, and results used during analysis.

Projects

HR Data Analytics Dashboard – Microsoft Excel **GitHub**

- Cleaned and analysed employee data to study workforce demographics, department distribution, attrition, performance, and salary-related patterns.

- Created an interactive Excel dashboard using PivotTables, PivotCharts, slicers, formulas, and key performance indicators.
- Identified employee trends and presented insights in a clear format to support HR decision-making.
- Performed data-quality checks to ensure accurate calculations and consistent dashboard outputs.

E-Commerce Sales Analysis Dashboard – Power BI

GitHub

- Processed and analysed sales data to evaluate revenue, orders, product performance, customer behaviour, and regional trends.
- Created calculated columns, measures, KPI cards, charts, filters, and interactive reports using Power BI.
- Identified high-performing categories, sales trends, and business improvement opportunities from the analysed data.

Weather Forecast Data Analysis – Power BI

GitHub

- Collected and cleaned weather data for Hyderabad, Bangalore, and Kakinada by removing duplicates and correcting inconsistent values.
- Developed an interactive Power BI dashboard displaying temperature, weather conditions, humidity, and city-level comparisons.
- Used charts, cards, filters, and geographical visualizations to communicate weather patterns effectively.

Customer Segmentation – Python

GitHub

- CPerformed customer segmentation by analyzing demographic and purchasing data using Microsoft Excel, PivotTables, and advanced formulas.
- Developed an interactive Excel dashboard with PivotCharts, slicers, and KPIs to visualize customer segments and purchasing trends
- Generated actionable business insights by identifying high-value customer groups and buying patterns to support data-driven decision-making.

Education

Malla Reddy College of Engineering and Technology

Bachelor of Technology in Data Science

June 2023: Present

CGPA: 8.25

- Relevant coursework: Data Analytics, Database Management Systems, Machine Learning, Statistics, Data Mining, Business Intelligence, and Artificial Intelligence.

Certifications

- Data Analysis with Python – IBM
- Python 101 for Data Science – IBM
- R Programming – IBM
- Data Analytics Job Simulation – Deloitte
- GenAI-Powered Data Analytics Job Simulation – Tata
- MySQL Certification – Great Learning
- Introduction to Data Science – Great Learning
- Cambridge English Empower C1

Leadership and Activities

- Served as a Class Representative and coordinated communication between students, faculty members, and department leadership.
- Coordinated departmental activities, student events, technical sessions, presentations, and project reviews.
- Worked as a Google Developer Groups core team member and volunteered for technical events and hackathons.
- Demonstrated teamwork, leadership, public speaking, event coordination, and interpersonal communication skills.
